

Lite-Puter bring us to the happy dreamland Lite-Puter & Janfusun Fancy World

Janfusun Fancy World

Ever since 1990, Janfusun Fancy World has been one of the best resorts in Taiwan. The entire theme park takes up more than 60 hectares, and it contains the four major themes of recreation, fun, culture, and technology. The four theme park areas and the abundant world-class facilities will bring you excitement and fun in your lives.

Providing diverse and abundant services, Janfusun Fancy World has established the first and the largest nighttime recreation park in Taiwan. This dynamic park includes exciting night activities, the exotic Para Para restaurant, constellation KTV, magical big screen movies, outdoor fireworks, live performances, street performance, coffee plaza, local foods, tea shops and acres of walkway for families and lovers. In Janfusun External Park, everyone can enjoy the night.

Beside the activities mentioned above, the most special one is the large-scale live show--light waterfall that consists of 2,500,000 lamps. It can do lighting live show at specific time and change with the music rhythm. It burns bright the night of Janfusun Fancy World.

Many facilities in the Fancy World were using Lite-Puter's lighting control system, like star tunnel, rainbow tunnel, water & light dance, fountain walkway and Prince Hotel. Lite-Puter brings soul into the facilities and makes what is good still better.

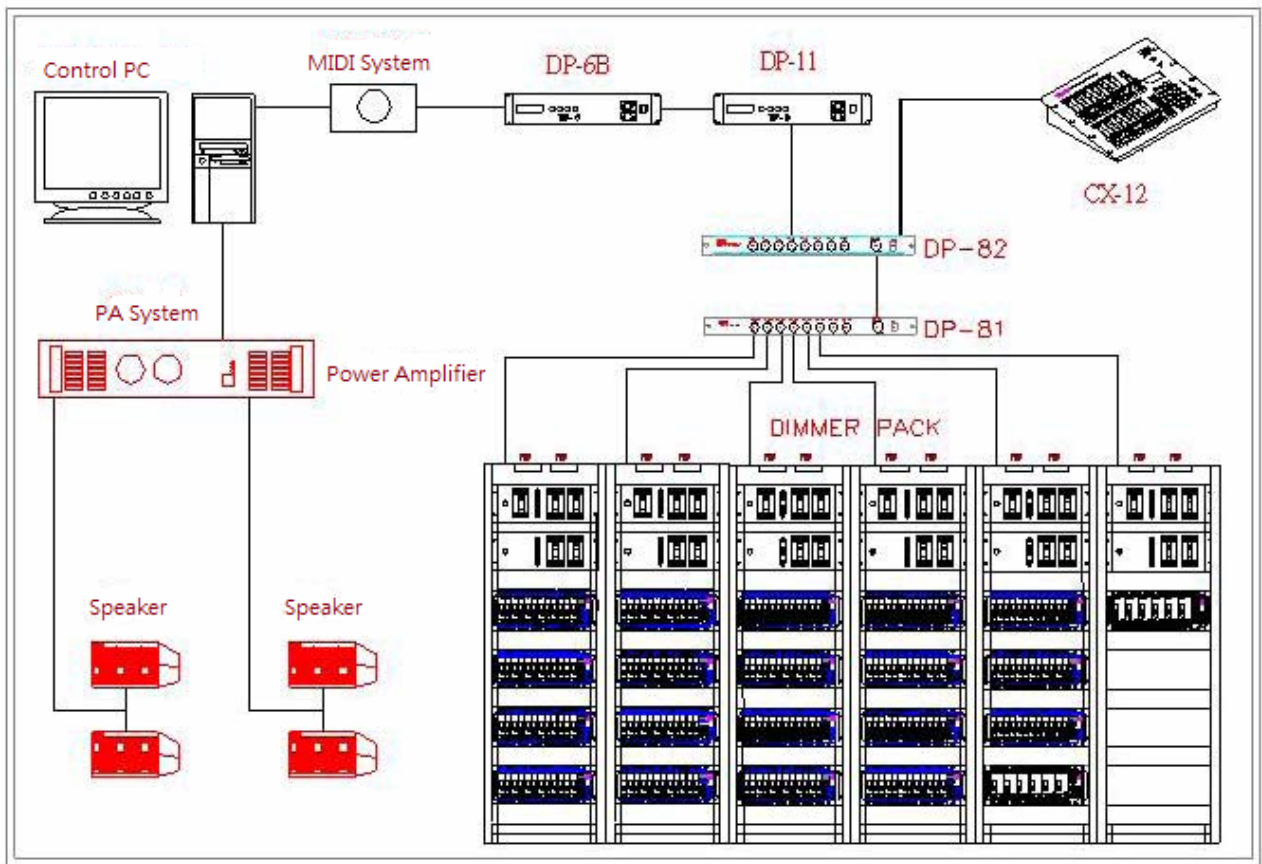

Light Waterfall System

Light waterfall show is the signature one in Janfusun. Every evening, the waterfall will perform lighting effect changes with the music. The light waterfall burns up Janfusun's night. The visitors feel themselves like being in a concert in Niagra Fall.

Light waterfall has 228 channels, 11,990 star-shaped lights and 2,500,000 lamps. They all can change with the rhythm of music, which has a high demand on the lighting control system.

Lite-Puter's lighting control system perfectly done this job and greatly impressed the visitors.

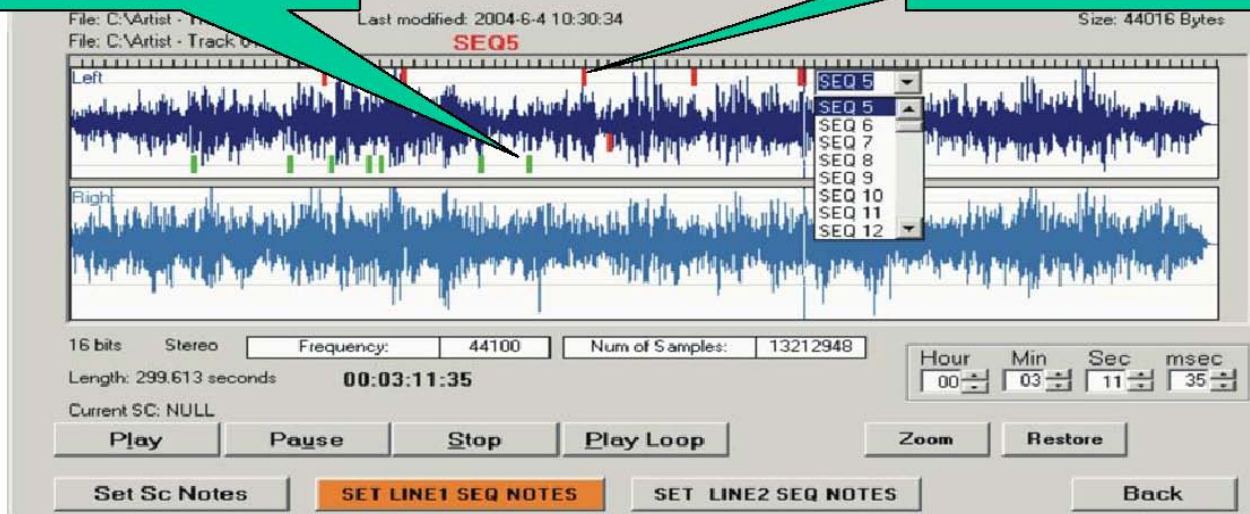

Lite-Puter lighting control system—DP-E200 control software can control 512 channels, set 1000 scenes, and program 500 chasers, which brings the show into full play. In this case, the control system makes the simple star-shaped lamps in huge amount play a touching and impressive performance. Lite-Puter provides the total solution for the control of huge channel lighting system.

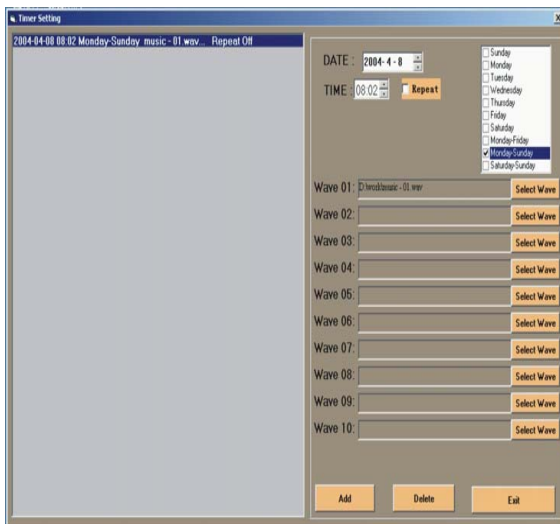

Preset fog output

Preset lighting change

In order to make the light perfect match the music, the software can download music and enable us to see the music waveform, we can put preset lighting change or other settings into an exact time point, the time can accurate to microsecond.

Its auto timer function can set performance program, performance time and date. It can execute specific program on a special day. This function can save management cost and avoid manual operation mistakes.

Lite-Puter's control software can link to internet to do the long-distance control, which greatly facilitate you work.

Human Based :

Lite-Puter lighting control system is high user friendly. In this case, its easy operation and high-speed reaction is perfectly showed. It combines colorful vision and moving music together. Different time, different effect but the same perfect performance.

Easy Management :

Lite-Puter's module design enables easy management and quick maintenance. It can automatically execute the setting, and manual operation is also available for special performance.

Environment Protection and Energy Save :

Each channel in light waterfall is 20A, total 4560A. In order to save energy and not influence the performance effect, all channel's output is limited to 50%. It can save 2000A energy. Lite-Puter lighting control system does our part for environment protection.

Prolong fixture life-span :

It can 5 times prolong fixture life-span, and greatly decrease lighting system operation cost and save labor cost.
